Networking Potential”*

Riga, Latvia

26th - 27th September, 2023

PROGRAMME

Tuesday 26 September, 2023

Ogre Technical School, "Ogres meža tehnikums", Aizupes, Tīnūšu pagasts, Ogres novads

07:00 – 08:00 **Breakfast in the Hotel**

08:00 – 09:00 **Way to the Ogre**

Hotel Radisson Blu Rīdzene - meeting point at 8.00 in front of the hotel

Ogre is the principal town of Ogre Municipality in Central Latvia, 36 kilometres (22 miles) east of the capital Riga, situated at the confluence of the Daugava and Ogre rivers. It has been a town since 1928. The population in 2020 was 23,273. The name of the town comes from the Ogre river. The Ogre village was first mentioned in 1206, called "Ogre" in German. In 1861, when a railway Riga–Daugavpils was built, Riga's residents started to build summer cottages here. In 1862 Ogre became a health resort.

Parallel on site visits (chosen in the conference platform)

The site visits are based on **particular concepts** – illustrated by a VET or other type of institution

8:00

Departure to sites (pre-booked options) Hotel Radisson Blu Rīdzene - meeting point in front of the hotel at 8.00

Option 1

Bulduri Technical School

1. Digitalisation / smart / E-gardening
2. Knowledge triangle – Education and Training, Research, Business/ Entrepreneurship

Bulduri Technical School is a professional secondary education school in Bulduri, the oldest school in Latvia with a focus on horticulture. Bulduru Technical School is located in the territory of the ancient Bilderliņi crown manor on the banks of Lielupe, near the sea. Since 1910, future specialists in the field of horticulture and horticulture have been educated in this place. Nowadays, this school also prepares young specialists in the tourism, hospitality and catering industries!

Option 2

Latvian University of Life Sciences and Technologies

1. Permeability – VET, HE
2. Young teachers and trainers
3. Green education for sustainability

Latvian University of Life Sciences and Technologies, previously Latvian Agricultural University (LLU), is a university of biosciences and technologies that implements research and study programs in biosciences, engineering sciences and social sciences. Due to the proportionally large number of university students, Jelgava, the city where the university is located, is sometimes called the student capital of Latvia. The university specializes in forestry, agriculture, horticulture and veterinary science.

Option 3**Riga State Technical School (RVT)**

1. Renewable Energies and recycling of materials
2. Rail Baltic project
3. Printing and Media

Professional Education Competence Centre Riga State Technical School (RSTS) is the most versatile vocational education competence centre in Latvia. At the moment 39 accredited vocational education programmes are being implemented in RSTS. In 14 different vocational secondary education programme groups, as well as professional development and further education programmes. There are more than 2000 students in RSTS.

Option 4**Riga Tourism and Creative Industries School (RTRIT)**

1. Culinary heritage and international networking
2. Artificial Intelligence

Riga Tourism and Creative Industries School offers professional secondary and vocational education programs for both primary and secondary school graduates - in the department of food production and catering, in the department of hospitality, tourism and commercial sciences or in the department of fashion, style and design. With approximately 2000 students, currently, this is one of the largest vocational education institutions in Latvia.

Option 5**Riga Media and Art School (RMMT)**

1. Arts and Crafts for sustainable development (including restoration)
2. Digital approaches and Media

Riga Art and Media Technical School is a modern professional education institution. A place where age-old art meets modern technology. School specializes in the art industry, training students in video, photography, animation, web design, wood and metal artistic processing, textile and clothing design and many other areas.

Option 6**Vidzeme Technical School of Technology and Design –
Agriculture and Innovation**

Vidzeme Technical School of Technology and Design unites two professional schools - Priekuļi Technical School and Cēsis Technology and Design High School. Vidzeme Technical School of Technology and Design unites two professional schools - Priekuļi Technical School and Cēsis Technology and Design High School. Students are offered at least 20 educational programs in the fields of agriculture, IT, computer systems and telecommunications, construction, wood product manufacturing and design, and road transport and mechanical engineering.

Option 7**Smiltene Technical school**

Veterinary medicine in VET

Smiltene Technical School is the only educational institution in Latvia that offers young people the opportunity to learn veterinary professions after graduating from primary school. At the school, it is also possible to learn horticulture, hospitality and catering, processing of wood materials and other professions in demand on the labour market. The school's students improve their professional knowledge in the school's veterinary training clinic equipped with the latest equipment, hotels, a training restaurant, a simulator classroom and a training ground built by the students themselves.
